

POLYESTER BOTTLE RESINS

Production, Processing Properties and Recycling

Table of Contents

- A. Preface**
 - ~ The Book
 - ~ Short Outline to PET Resin Market and Prices
 - ~ Remarks to Latest Trends in PET Resin Industry

- B. PET Production**
 - B-1 Raw materials**
 - B-2 Melt Phase Polycondensation**
 - ~ Discontinuous Process
 - ~ Continuous Process
 - B-3 Solid State Polycondensation**
 - ~ Discontinuous Process
 - ~ Continuous Process

- C. Resin Types and Related Polymer Compositions**
 - C-1 Why Different Resins For One Step and Two Step Bottle Production?**
 - C-2 Polymer Recipes**
 - C-3 Carbonated Soft Drink CSD**
 - C-4 Water**
 - C-5 Hot Fill and Heat Set**
 - C-6 Special Properties**
 - ~ Fast Reheat (FHU)
 - ~ Barrier
 - ~ UV Protection

- D. Resin Quality Parameter and Impact to Bottle Processing and Bottle Quality**
 - D-1 Intrinsic Viscosity**
 - D-2 Carboxyl End Groups COOH**
 - D-3 Co-monomers DEG, IPA, NDA**
 - D-4 Color Figures L, a, b**
 - D-5 Thermal Data Tg, Tk and Tm**
 - D-6 Acetaldehyde and Formaldehyde**
 - D-7 Granulate Shape and Size, Size Distribution**
 - D-8 Crystallization and Degree of Crystallinity**
 - D-9 Moisture**
 - D-10 Catalyst and Stabilizer Residues**
 - D-11 Pellet Irregularities**
 - ~ Black Spots, Gels
 - ~ Old Polymers
 - ~ Vacuoles,
 - ~ Blends

- E. Polyester Chemically and Physically Analysis**

- F. Resin Handling, Preparation and Processing**
 - F-1 Storage**
 - F-2 Conveying**
 - F-3 Drying**
 - F-4 Extrusion**
 - F-5 Degradation during Processing**

- G. Additives**
 - G-1 Methods of Additive Feeding and Dispersion**
 - G-2 Colorants**
 - G-3 Gas Barrier**

- G-4 Fast Reheat (FHU)**
- G-5 O₂ Scavenger**
- G-6 AA Scavenger**
- G-7 Crystallization Enhancer**
- G-8 Antiblocking and Slip Agents**
- G-9 Antisatatic**
- G-10 Pigments White and Black**
- G-11 UV Barrier**
- G-12 Nano Additives**

- H. Polyester Bottle Recycling**
- H-1 Market Situation and Market Development**
- H-2 Bottle Collection**
- H-3 Waste and Bottle Sorting**
- H-4 Flake Production Process**
 - ~ Dry or Wet Grinding
 - ~ Washing
 - ~ Separation
 - ~ Etching
 - ~ Rinsing
 - ~ Drying
 - ~ Water Treatment
 - ~ Flake Separation/Purification
- H-5 Further PET Flake Treatment and Processing**
 - ~ Re-Pelletizing
 - ~ Bottle Resin Production
 - ~ Flake Decontamination – URCC
 - ~ Main Application Fields of Recycled PET

- I. Alternative Bottle and Packaging Polymers**
- I-1 Metallocene Based Polypropylene**
- I-2 Poly Lactic Acid**
- I-3 Modified Polystyrene**
- I-4 Polycarbonate**
