

Collection of Equipment Supplier for the Polyester Recycling Industry

Ulrich Thiele, Polyester Technology service, Bruchköbel, Germany, 2010

The recycling industry specialized in plastic recycling and here namely in recycling of polyester bottles is growing substantially. The current market size of about 5 – 6 million tons of annual recycled polyester bottles requires an increasing supply of single equipment, sorting and washing lines, fully equipped recycling lines, recycling and production know how and engineering services. To get faster access to those resources a collection of important companies active in this special market segment is available now. Visiting the websites of the collected companies will provide more details about their capabilities in polyester recycling.
